Our Tool and die makers are among the most highly skilled workers in manufacturing. Our Toolmakers craft precision tools and machines craft prototypes, often working with engineers and designers, determine how best to manufacture the part. In addition to developing, designing, and producing new tools and dies. These workers produce the jig and fixtures, and special holding devices that enable our machines to manufacture a variety of parts we produce daily.

**Parallel a company INLINE with your needs**

Carbide Dies

Small Dies

Large Dies

Compound Dies

Progressive Dies

Trim Dies

**Parallel Tool & Die, Inc. has over 37 years experience with CARBIDE Dies and Products**

Before we select a specific grade, we first consider the raw material type, hardness, thickness and the complexity of the part. This information is used to determine how best to manufacture the parts

The right combination of highly skilled Toolmakers and the state-of-the-art equipment allows us to Braze, Wire EDM, Plunge (sinker) EDM, and Grind to the shape, size, and tolerance needed.

**The difference is experience!**
